SAPPHIRE

Cada color presenta 9 superficies diferentes, de aspecto irregular y desgastado que crean un intencionado contraste de color y relieve entre las piezas. Los colores Coralito y Agatha craquelan de un modo uniforme. El resto de los colores utilizan esmaltes reactivos y ckaquelan de modo más ancho, desigual y menos evidente al principio, ganando uniformidad con el paso del tiempo.

Each color has 9 different surfaces, with an irregular and worn appearance that create an intentional contrast of color and relief among the pieces. Colors Coralito and Agatha both crackle evenly. The rest of the colors use reactive enamels and crackle in a wider, more uneven and less evident way at the beginning, becoming more even as time goes by.
