

The background is a detailed oil painting of a rugged coastal scene. In the foreground, dark, craggy rocks are partially submerged in a calm body of water that reflects the sky and the surrounding cliffs. The middle ground features steep, layered rock formations in shades of ochre, tan, and grey, with some green vegetation clinging to the upper slopes. The sky is a pale, hazy blue with soft, white clouds. A semi-transparent white rectangular box is centered over the middle of the image, containing the text 'Elmina' in a large, bold, serif font, with a small dark triangle above the 'i'. Below it, in a smaller, all-caps sans-serif font, is the subtitle 'THE BOLD PLETHORA'.

Elmina

THE BOLD PLETHORA

Elmina

THE BOLD PLETHORA

Elmina is the porcelain tile series enthused by gold limestone originally used by Spanish and Portuguese conquerors in their construction of castles and fortresses all across the Atlantic Coast of Africa. Mottles of orange and yellow add brilliance while tonal veins of ivory and gold soothing tones add feature to the gold limestone inspired design of Elmina.

Dubbed after the oldest fortress of the Atlantic Coast, the comfortable yet regal opulence of Elmina is the perfect fit for any space which needs the temperate charm of its soothing tones.

Elmina by Niro Granite consists of 4 bold tones with formats of 30x60cm, 60x60cm and 60x120cm. The structured and lappato surfaces allow for a smooth continuity in both internal and external environments. Embolden your surrounding space with specks of gold to the bold plethora of Elmina.

The image displays four large rectangular tiles arranged in a staggered, overlapping fashion. The top-left tile is a light beige color with a subtle, natural stone pattern. The bottom-left tile is a medium grey with a fine, pebbled texture. The bottom-right tile is a dark grey with a more pronounced, coarse texture. The top-right tile is a dark brown with a complex, organic pattern resembling natural stone or wood grain. The tiles are set against a plain white background.

Each different tiles series are produced to meet different performance requirements. For specific product technical performance, please request from Niro Granite sales team or their agent or distributor.

Colour Variations: Since the colour reproduction in this printed piece will vary from the actual tile colours, final selection should be made from tile samples. Colour, shade and glaze variations may exist due to the inherent characteristics of porcelain tile.

Due to the low porosity of porcelain tiles, an Improved High Performance Cementitious adhesive in accordance to BS EN 12004 & ISO 13007-1 is highly recommended for proper installation. Products that meet this standard are available amongst leading adhesive manufacturers. Please seek expert advice from adhesive manufacturers for proper selection and application.

SHADE AND TONALITIES

V1**UNIFORM**
FROM TILE TO TILE

V2**SLIGHTLY NOTICEABLE**
FROM TILE TO TILE

V3**MODERATELY NOTICEABLE**
FROM TILE TO TILE

V4**DISTINCTLY NOTICEABLE**
FROM TILE TO TILE

V1

Uniform from tile to tile
The range of colours and tones within the same shade is relatively uniform from tile to tile. Minimal to no difference among pieces from the same production run.

V2

Slightly noticeable from tile to tile
The range of colours and tones within the same shade is slightly noticeable from tile to tile. Clearly distinguishable differences in design or pattern with similar or slight change in colour tones.

V3

Moderately noticeable from tile to tile
The range of colours and tones within the same shade is moderately noticeable from tile to tile. Clearly distinguishable differences in design or pattern.

V4

Distinctly noticeable from tile to tile
The range of colours and tones within the same shade is distinctly different from tile to tile. Random colour differences from tile to tile, so that one tile may have totally different colors from that on other tiles. Final installation can be unique.
