Creating Life Experience

2019

Founded in the year 1979, Niro Granite's first manufacturing plant was established in Cresiano, Switzerland to announce the presence of porcelain tiles to the world. Ever since that, varieties of tiles were exported worldwide and the rapid growth in Asia markets has successfully led to the establishment of Niro Ceramic Malaysia in 1988 and further expanded to Indonesia, China, Vietnam, Spain, India and Philippines.

Throughout the years, Niro Granite has succeeded in preserving the Swiss Heritage of always delivering high quality products and services to the customers despite having many new product lines and numerous geographical expansions.

Moving forward, our people are enthusiastic with the great possibilities ahead. As clearly stated in our corporate mission statement, we strive to bring you the best trendy collection of high quality porcelain tiles, efficient customer services and most important of all, the strategies value added we bring to our partnership all around the world.

Each different tiles series are produced to meet different performance requirements. For specific product technical performance, please request from Niro Granite sales team or their agent or distributor.

Colour Variations: Since the colour reproduction in this printed piece will vary from the actual tile colours, final selection should be made from tile samples.
Colour, shade and glaze variations may exist due to the inherent characteristics of porcelain tile.

Due to the low porosity of porcelain tiles, an Improved High Performance Cementitious adhesive in accordance to BS EN 12004 & ISO 13007-1 is highly recommended for proper installation. Products that meet this standard are available amongst leading adhesive manufacturers. Please seek expert advice from adhesive manufacturers for proper selection and application.
